Orther
RESTful API, Figma, Photoshop basic

Professional Objective

As a Front-End Developer with over 3 years of experience, I am eager to contribute in a professional environment where I can leverage my programming skills and modern UI design expertise to deliver exceptional user experiences. I am committed to continuous learning and growth, with the long-term goal of becoming a Full-Stack Developer.

Work Experience

Front-end Developer   11/2021 - 05/2025

FPT Software

- Develop and optimize web interfaces using frameworks such as Next.js, React, Angular, etc.
- Collaborate closely with UI/UX Designers to implement designs into real products
- Optimize performance and user experience on both desktop and mobile browsers
- Use Git for source code management and team collaboration
- Learn and apply Agile and Scrum processes in team workflows
- Set up project environments using Git

Education

Major: Software Engineering   10/2017 - 09/2021

FPT University

Bachelor of Business Administration
GPA: **7.0/10 – Good**

Awards

2022 - 2025
Multiple-time recipient of the Best Performance Award at both the Business Unit (BU) level and company-wide level at FPT Software (FSoft)

Projects

Developer Front-end   2024 - 2025

SCSK

- Collaborate with the team to design solutions and resolve technical issues
- Develop and maintain the system throughout the project lifecycle
- Contribute to the development and implementation of key features

Leader Front-end   2024 - 2024

HondaVN

- Work with the team to design solutions and resolve issues
- Develop and maintain the system
- Participate in the development and debugging of key features
- Perform code reviews
- Set up the development environment

Developer Front-end   2023 - 2024

FPT Retail

- Design, implement, and maintain software applications
- Take primary responsibility for coding most of the user interface (HTML/CSS, ReactJS); develop and address UI issues based on client requirements
- Write code and collaborate with backend developers
- Conduct code reviews and propose technical solutions
- Participate in evaluating code quality (code review)

Front-end Developer   2021 - 2023

Several other projects at FPT Software.
